Evaluation Criteria (Total: 100 Marks)

Each parameter is scored out of 20. Refer to the scoring guide below for marking bands.

#	Parameter	Key Evaluation Questions	Max	Marks Awarded
1	Problem Understanding & Relevance	- Does the team clearly understand the problem statement, target users, and their pain points? - Is the actual problem being solved (not a tangential version)? - Is the relevance to the given PS and its real-world context evident?	20	
2	Innovation & Uniqueness	- How novel is the proposed approach compared to conventional methods? - Is the solution substantially different from existing solutions? - Does the idea show original thinking rather than a repackaged product?	20	
3	Feasibility & Technical Approach	- Can the solution realistically be built with the technology proposed? - Is the approach achievable within the hackathon timeframe and skill set? - Are the proposed tools, frameworks and data sources appropriate?	20	
4	Impact & Scalability	- What is the potential social, industrial, or economic impact? - How many users/beneficiaries can it realistically reach? - Can the solution scale geographically/technically and is it sustainable?	20	
5	Solution Clarity & Execution Plan	- Is the system architecture and workflow clearly defined? - Is there a credible implementation roadmap with justified tech choices? - Is the overall presentation clear, structured, and easy to follow?	20	
TOTAL SCORE			100	

Scoring Guide (per parameter, out of 20)

Band	Descriptor
17–20 Excellent	Outstanding, well-justified, and clearly articulated. Sets the idea apart.
12–16 Good	Solid and credible, with minor gaps in depth, evidence, or articulation.
7–11 Average	Basic attempt present but lacks depth, originality, or supporting detail.
1–6 Weak	Poorly understood, generic, or largely unaddressed; significant gaps remain.
0 Not Addressed	No meaningful attempt made on this parameter.
