Education

Vishwakarma Institute Of Technology Pune,		
IN Computer science (Artificial Intelligence) – CGPA: 9.2		2024-present
School Of Scholars Yavatmal ,		
IN CBSE	– Percentage: 96.80	2022
Peoples college of arts science and commerce yavatmal,		2024
IN HSC	– Percentage: 84.67	

PROJECTS

1. Instant Hospital Bed Reserver

2024

Developed a web-based system to search, book, and manage hospital beds in emergencies. Integrated doctor availability checks and a secure login system using HTML, CSS, PHP, and MySQL to reduce patient wait times and prevent critical delays.

2.AI-Based Drone Swarm Flood Surveillance System

PYTHON, YOLOV12, OPENCV, FASTAPI, REACT, LEAFLETJS, SQLITE

2025

Developed a computer vision-based system to detect stranded people in flood areas using drone footage. Implemented victim detection, monocular water depth estimation, and priority-based rescue heatmaps to assist authorities in identifying high-risk zones and optimizing rescue operations.

3.Gmail & Calendar AI Agent

2025

Developed a conversational AI assistant using FastAPI, OpenAI (Gemini), and Google APIs to summarize Gmail messages, auto-schedule tasks on Google Calendar, and respond via voice or text in a ChatGPT-style web interface.

4. FAQ-Based RAG AI Agent in n8n

2025

Designed a Retrieval-Augmented Generation (RAG) AI bot in n8n to handle customer FAQs using vector embeddings and OpenAI GPT, streamlining support with context-aware, real-time responses

5.PhysioCheck: Personalized AI Physiotherapy Platform

2026

Designed an end-to-end AI solution for home-based rehabilitation, featuring a training module that allows users to create custom exercise routines via step-by-step pose recording. Integrated a sophisticated "Muscle Visualizer" that provides real-time heatmaps of primary and secondary muscle activation during exercises to ensure optimal form.

Skills

Languages: C++, Python, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks: React.js, Next.js, Tailwind CSS, Node.js, Express.js, React Native, MongoDB

Developer Tools: VS Code, Linux, Git, GitHub, Docker, Postman, Neovime

Coursework: : Data Structures Algorithms, DBMS, Object-Oriented Programming, Competitive Programming, Operating System, Machine Learning

CERTIFICATES

INFOSYS SPRINGBOARD : AI foundation, HTML-5, Introduction to deep learning, Introduction to NLP, Introduction to AI , Data Analysis using excel, Robotics

Honors And Awards

- Qualified for last round in national level hackathons (Codeapex) and participated in 8+ hackathon .

EDUCATION

Vishwakarma Institute Of Technology

Computer science (Artificial Intelligence) — CGPA: 9.25

Pune, IN

Sept. 2024 – April. 2028

Decent Junior College of Engineering

HSC Percentage: 75.5

Nagpur, IN

Sept. 2022 – May. 2024

Providence girls High School

1-10 Percentage: 93.28

Nagpur, IN

Sept. 2012 – May. 2022

PROJECTS

AI-Powered Flood Surveillance System | *Python, YOLOv12, OpenCV, FastAPI, React, Leaflet.js, SQLite* | [GitHub](#)

- Developed an AI-powered flood monitoring platform that analyzes drone/CCTV video clips to detect trapped individuals and provide real-time intelligence for emergency response.
- Implemented computer vision pipelines using **YOLOv12**, **OpenCV**, **MediaPipe**, **DeepFace** for people detection, demographic classification (adult/child/elderly), distress signal recognition, and flood depth estimation.
- Built a city-wide interactive disaster dashboard that visualizes flood severity, detected individuals, and rescue priorities across multiple monitored locations.

God's Hand (Rubik's Cube Solver) | *C++, Pistache, RapidJSON*

- Modeled a virtual Rubik's Cube using three different representations and developed the backend using the Pistache C++ framework.
- Implemented four solving algorithms including **BFS**, **DFS**, **IDDFS**, and **IDA***.
- Achieved a solving time of **under 1 second** for a Rubik's Cube scrambled up to 14 moves using the **Korf IDA* algorithm**.

WellCare – Smartwatch-based Health Monitoring System | *Python, Arduino/ESP32, IoT*, [GitHub](#)

- Designed and prototyped a wearable **IoT-based health monitoring smartwatch** capable of tracking vital parameters such as heart rate, SpO₂, and body temperature in real time.
- Integrated biomedical sensors with an **ESP32/Arduino embedded system** to continuously collect physiological signals and process health metrics.
- Implemented **Bluetooth-based wireless communication** to transmit health data in real time and generate emergency alerts for remote patient monitoring.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks: React.js, Next.js, Tailwind CSS, Node.js, Express.js, React Native, MongoDB, Git, Github

Developer Tools: VS Code, Linux, Git, GitHub, Docker, Postman, Neovim

Coursework: : Data Structures Algorithms, DBMS, Object-Oriented Programming, Competitive Programming, Operating System, Machine Learning

HONOURS & AWARDS

- Achieved rank 965 In ICPC - Highest in girls from our college ,uptil now
- Contributor to GirlScript Summer of Code.
- Virtual Internship at Prisim – developed Android applications in Kotlin.
- School- Won many Olympiads (NSO,IMO,IEO)

EXTRACURRICULAR ACTIVITIES

- Visited local NGOs supporting girls' welfare as part of the Avishkar initiative (SWD club).
- Coordinator at Gedit coding club -DSA , CP .
- Engaged in competitive programming and problem solving.
